Research Professor

Dr. Joshua Lederberg
Department of Genetics
College of Agriculture
The University of Wisconsin
Madison 6, Wis.

Dear Josh:

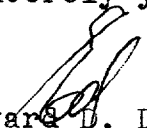

Would you be good enough to send me as complete a set of your reprints on bacterial genetics as you have available so that we can use these for reference in our work? I would greatly appreciate this.

I have been meaning to send you a couple of slides, and will do so in the very near future.

I hope Miss Lively's work is coming along on the cytology of coli. How soon will she be ready to publish it?

Best regards to you and your good wife.

Sincerely yours,

Edward D. DeLamater, M.D.
